

20. Five Elements of Earth, eleven components+1: Regulation, Relations and Laws

From the generation of the 5 Elements - 11 components plus one, including the Master of the Heart (unstructured function), the following conclusions emerge (Pl. 44): _____

The set of triplets or "little yang" hexagrams constitutes a system generated (by the eight polarized radi cals). This system is structured, because of its generation, in 5 Elements, 11 components:

Wood – Fire – Earth – Metal – Water

Each of the Elements is polarized in Yin and in Yang:

Example :

Water	yin	GG-series	=R
	Yang	CAG – CAA = V...	

The set of 5 Elements as “generator” will specify the three Hearths of a new system (generated) which will in turn become generator.

The law of generation, structuring and regulation of the 5 Elements is represented by two great cycles (Pl. 55, fig. 1): _____

- *Sheng* cycle , circular, in which, for the Yin of a hand, for the Yangs on the other:
 - the group of triplets of an Element (mother) activates the group of triplets of the next Element (son):
Water activates Wood which activates Fire... (Water gives up its

THE MORE BALD DIAMOND

gie au Bois...) R activates F which activates Cr... GG series activates AAG-AAA which activates CG series...

- conversely, the group of triplets of an Element (child) slows down the group of triplets of the previous Element (mother):

Fire slows down Wood which slows down Water... (Fire absorbs the energy of Wood...); Cr brakes F which brakes R... CG series brakes AAG-AAA which brakes GG series...

- Cycle *Ke* of the five-pointed star, in which, for the Yin on the one hand, for the Yang on the other (Pl. 55, fig. 2):

- The group of **doublets** of the “proper generator” corresponding to an Element facilitates the components of the preceding “generated” Element. Conversely, the components of the generated Element inhibit the group of **doublets** of the next generating Element in the *Ke* cycle.

Example :

- Generated Fire inhibits Generating Metal
- (Cr) generated inhibits (P) generator
- generated CG series inhibits C'A"-C'C" generator

THE MORE BALD DIAMOND

By extension, one can consider that the group of triplets of an Element inhibits the group of triplets of the next Element in the *Ke cycle*. (Plate 55, fig. 1)

Due to the "antennae" projected by the internal function, 5 Elements/11 components, at the level of the external function, 6 Qualities/12 components, the external function components will react in the same way as the internal function components to the stimulations undergone by the latter, according to the laws of the 5 Elements (Pl. 55, Fig. 3):

- the stimulation of Fire, component Cr, Yin, series 10, CG, will simultaneously stimulate
 - the Fire value of each of the six Yin components of external function [*Ying point*]
 - the Cr component of external function, UUG-UUA (Fire aspect of the Fire quality)
- the stimulation of Fire, component IG, Yang, CC series, will simultaneously stimulate
 - the Fire value of each of the six external function Yang components [*Jing (King) point*]
 - the external function IG component, CU series (Fire aspect of Cooling quality)
- the stimulation of Earth, component Rt, Yin, series 3, UC, will simultaneously stimulate
 - the Earth value of each of the six Yin components of external function [*Shu point*]
 - the external function Rt component, UUU-UUC (Wet aspect of the Humidity quality)...

It will be the same for each of the components of the 5 Elements.

It should be noted that, due to the similarities between:

THE MORE BALD DIAMOND

Rt and E	Elements	(UC and AGU – AGC series)
Cr and TF Elements		(CG and AGG – AGA Series)
Cr and GI	Meridians (UUG – UUA and CU series)	

- any stimulation of Rt Element will stimulate the same kick,
 - the Earth value of each of the 12 external function components, whether Yin or Yang;
 - E, Element, and by repercussion Rt and E, meridians.
- any stimulation of E Element will stimulate of the same kick,
 - the Earth value of each of the 12 external function components whether Yang or Yin;
 - Rt Element and by repercussion E and Rt meridians.
- any stimulation of Cr Element will stimulate the same kick,
 - the Fire value of each of the 12 external function components, whether Yin or Yang;
 - TF Element and by repercussion Cr, TR and IG meri say.
- any stimulation of TF Element will stimulate the same kick,
 - the Fire value of each of the 12 external function components, whether Yin or Yang;
 - Cr Element and by repercussion TR, Cr and IG meri say.
- any stimulation of the IG meridian will stimulate the same kick,
 - the Fire value of each of the 12 external function components, whether Yin or Yang;
 - and by repercussion IG and Cr meridians.

The antennas at the level of the external function (small Yin and Yang circulations and specific points) will therefore decode this information and

THE MORE BALD DIAMOND

will integrate into the system of the 6 Qualities/12 meridian components.

The "triple Hearth" component and the group of triplets which represents it at the level of the internal function (AGG-AGA) code the impulses received by the 5 Elements, thus allowing the central function, three Hearths, to integrate the corresponding information and to react according to its own laws.

Consequently, the following laws apply at the level of the internal function, 5 Elements:

- **Mother-son law** (Pl. 55, fig. 1)
 - any Element (mother) activates the following Element (son) in the *Sheng* cycle
 - any Element (son) slows down the previous Element (mother) in the *Sheng* cycle.
- **Law of victory or inhibition** (Pl. 55, fig. 1)
 - any Element is victorious or inhibits the following Element going in the *Ke* cycle
 - any Element facilitates the previous Element in the *Ke* cycle.

The second of these laws also bridges the gap between the generator proper and the internal function system (Pl. 55, fig. 2):

- in the generative sense – generated: facilitation
 - in the direction generated – generator: inhibition
- **Law of relationship 5 Elements/6 Qualities** (Pl. 55, fig.3)

Any stimulated Element will stimulate its corresponding Quality/Element at the level of external function.

This one will then integrate the information transmitted in its own system of 6 Qualities/great meridians.
 - **Law of relationship 5 Elements/three Hearths – function central**

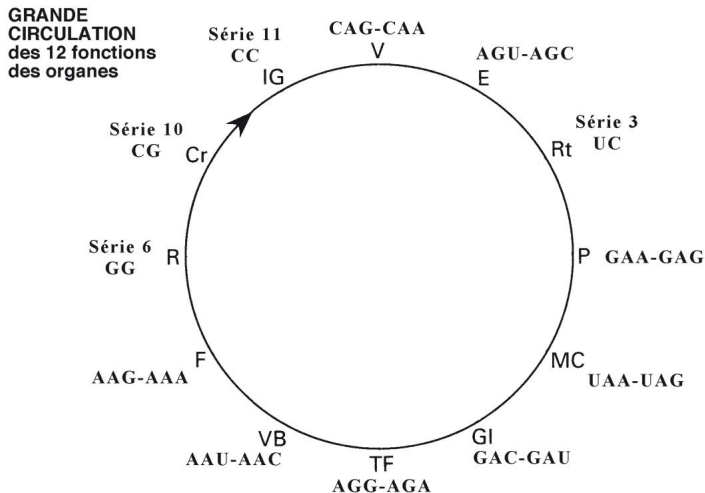

THE MORE BALD DIAMOND

Any stimulated Element transmits this stimulation to the central function, three Hearths, through TF, triple Hearth, Element, 2nd Fire, AGG-AGA.

From the discovery of the cycle of "Great Circulation" of the 12 functions of the 5 Elements, Master of the Heart (unstructured function) included, carried out from the cycle of generation of *He Tu*, and as a corollary to the preceding laws, one can deduce the laws following concerning him:

• **Mother-son law :**

- any activation of a component (mother) activates the component (son) which follows it in the general circulation;
- any braking of a component (child) brakes the component (mother) which precedes it in the main traffic.

By applying the Victory or inhibition cycle , *Ke cycle*, to this "Great Circulation" of the functions

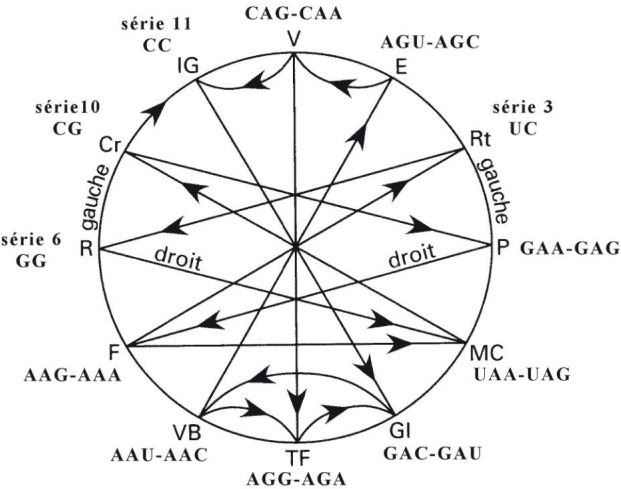

THE MORE BALD DIAMOND

organs and viscera in the 5 Elements, we first discover the following organs:

Cr, Fire	series 10 CG is victorious over P, Metal	GAA-GAG
P, Metal	GAA-GAG is victorious over F, Wood	AAG-AAA
F, Wood	AAG-AAA wins Rt, Earth Series 3 UC wins R,	series 3 CPU
Rt, Earth	Water Series 6 GG wins MC, 2nd Fire UAG-UAA	6GG series
R, Water		
MC, 2nd Fire UAG-UAA	is victorious over Cr, Fire	10 CG series

But, MC is both 2nd Fire and Earth which leads to the following:

F, Wood	AAG-AAA is victorious over MC (Earth) UAG-UAA	
---------	---	--

THE MORE BALD DIAMOND

Secondly, comes the sequence of viscera:

GI, Fire	series 11 CC	is victorious over GI, Metal	GAC-GAU
GI, Metal	GAC-GAU	is victorious over VB, Wood	AAU-AAC
VB, Wood	AAU-AAC	is victorious over E, Earth	AGU-AGC
E, Earth	AGU-AGC	is victorious over V, Water	CAG-CAA
Calf	CAG-CAA	is victorious over IG, Fire	11 CC series
Calf	CAG-CAA	is victorious over TF, 2nd Fire	AGG-AGA
TF, 2nd Fire	AGG-AGA	is victorious over GI, Metal	GAC-GAU

But, TF is both 2nd Fire and Earth which induces the following:

VB, Bois	AAU	AAC is victorious over TF (Earth)	AGG-AGA	
----------	-----	-----------------------------------	---------	--

From the above emerges the second law concerning the "Great Circulation" of the 12 functions of the 5 Elements:

• Law of victory or inhibition

- any Element is victorious or inhibits the following Element in the internal cycle of the organs or in that of the viscera, similar to the *Ke cycle*.

Note that in accordance with the traditional "Way of water and cereals", the right Kidney is victorious over the Master of the Heart¹⁶⁴, while the left Kidney gives its energy to the Heart. Likewise, it is the left Lung which receives energy from the Spleen, while the right Pou mon is victorious over the Liver. Finally the Master of the Heart controls the Heart.

Ultimately, if we accept this "Great Circu

¹⁶⁴ Master of the Heart is related with the *Ming Men* point (From May 4) where the original, transcendent energy is focused, *YuanQi*

THE MORE BALD DIAMOND

tion" of the 12 functions of the organs and viscera, this gives us the image of their relationships in space and time, and we can deduce that these functions must also correspond to a certain number of reactions specific physicochemicals¹⁶⁵.

The definition of this "Great Circulation" of the functions of the organs and the viscera as well as the study of the cycles which concern it, are not found, to my knowledge, in any of the classical texts, but nevertheless result from the Chinese logic of the energetic. The rules of application that we have specified have been applied and verified by numerous acupuncture practitioners for decades and have always proved to be perfectly in harmony with the reality of the facts.

We will see later which pathologies are concerned as well as the specific points to be used in relation to this "Great Circulation"¹⁶⁶.

¹⁶⁵ See chap. 33: *the Krebs cycle*.

¹⁶⁶ See chap. 32: *The 343 somatic and psychic energies*.
